Attendees: Shayla, Mae, Holly, Mike, Jennifer, Jane, Lindsey

Note taker:

12/3/13 _____ UAF

2/4/14 _____ UAS

2/18/14 _____ UAA

3/4/14 _____ UAF

3/18/14 _____ UAS

1. TR to adjust SHR2MJR to pull the new ethnicity field and the race field from SPAIDEN instead of only the old ethnicity field. **TR 101 already exists to modify ethnicity on reports. A student worker was working on it but has unfortunately quit. Work halted at the moment. If we come across reports that are not listed in the TR, please add (see Jane's email).**
2. NSC update
 - a. We can opt out by MAU or as a system.
 - b. Errors associated with opting out of this process will be hidden from our error report, so no increase in errors.
 - c. Must be able to send them a graduate only file. Thus, need to be able to filter SFR2CLH, which is why UAA is interested in adjusting that report to allow easier delimiting. In the short term, have figured out how to delimit the file using fixed width (which allows filtering by G status) but am awaiting feedback from NSC.
 - d. We should all be using A2 and P2.
 - e. **UAA and UAF wish to opt out. UAS will consult with Barbara when she returns next Monday.**
3. Primary campus – Parchment (Mae/Shayla). **Students are asking, "What defines primary campus?" Definition: "Select the campus at which you've completed a majority of your coursework and/or earned your most recent degree." Once language is approved, Lindsey will contact Joe.**
4. **TR 198 (Mike) – Could at least one additional parameter be added to limit which students the process touches, perhaps a campus parameter? Also discussed when this process will run. UAF would prefer to run it manually. With some data being pushed instantly (NODS apps, for example), we're questioning how this process will catch all special characters. It simply may not. Lindsey will follow up with Joe Knox and Jane. [Joe is currently working to add additional characters to the process.]**

Pending Business

1. TR 184 – Nightly grade roll. UAA, UAS and UAF have all confirmed this process is not working in PROD. Matt is researching to determine why.
