Admissions Work Team Audio Conference
Monday, May 9, 2005
10:00 AM
Meeting Minutes

Present: Libby, Mike, Colleen (UAF); Shontay (UAS); Sandy (Mat-Su); Patrick (SW)

1.   Status of pending projects:
        -- Checkbox on web application
        -- Choose a Campus
        These two were approved by all 3 MAU's to go to PROD for 5/13/05

        -- SRP2RMV (see email from Ian – with bold responses from ADMIS team)
Sorry to keep sending these one at a time, I send questions as I run
 into them.

 Part of the request was to have OE addresses created where they don't exist and have a PR address to
create them from.
 The data being used is listed as the PR Street Lines, City, State and Zip.

 I'm assuming you would also like the Nation code pulled over (YES), but what about:

FROM_DATE	Value: Today's date
TO_DATE	Value: Null
ACTIVITY_DATE / USER	Value: Today/Who Created
ASRC_CODE	Value: Null
DELIVERY_POINT	Value: Null
CORRECTION_DIGIT	Value: Null
CARRIER_ROUTE	Value: Null
GST_TAX_ID	Value: Null
REVIEWED_IND/USER	Value: Null
DATA_ORIGIN	Value: Null

 Which would you prefer to be left blank, which pulled over from the PR address, and which defaulted to new
data (such as perhaps, activity_date/user).

 Thanks again,
 Ian

    2.   Web for Prospect
    Both UAF and UAS have decided to move forward with this ASAP. UAA has already been working on it
    and wants to move forward ASAP.

3.   Middle name on SAR2TBL and SPAIDEN from web app push

All agreed that we prefer to have the middle name print on SAR2TBL and push to SPAIDEN if the student
supplies it. Q: is this something in our push parameters, or do we need to do a task request??

    3.   FSA Atlas – do we need access?
    We're not sure how often we might need access to Atlas, but the team agreed that one Admissions person
    at each campus *should* have View-only access. That way they could research and answer simple
    questions in the absence of the International Student Advisor.

Schedule next meeting – Monday, May 23 @ 10:00 AM.
