

Admissions Workteam Audio September 25, 2006

Present: Al Kastar, Patty Itchoak, Peggy Byers (UAA); Mike Earnest (UAF); Alicia Wyse, Patrick Tilsworth (Statewide)

1. SAR2ADM task request: We agreed with the request to add 'Apply Date' parameters and output. We agreed to add a parameter 'Null Decision Only?' (Yes/No, Required Field, Default Value = No). Patty will adjust task request and forward for next BST.
2. Mandatory indicator on SAACHKL – when this is unchecked, the item does not show on UAOnline. Patrick will check and see if there are options and report back to the team.
3. Patty's request RE: expiring student programs: approved.
4. Imaging update: Hyland Software has acquired Matrix Imaging, which is now Hyland's Higher Education Division. We have a test version of a new client – mount disk error seems to happen only when logged in through EDIR. MAC – compatible web client will be available before the end of the year. Imaging audio will be held this Wednesday 9/27.
5. Anchorage site code (AAN) is showing up on UAF applications on SAAADMS.
6. Peggy and Al wondered how Admit Type GT might be used to differentiate returning or transferring graduate students from first-time graduate students. They will talk to their IR people.
7. **From Patrick: Banner 7.3 is now in PREP and LRGP for testing. There were significant upgrades in Admissions functionality. Please test vigorously and report any problems to programmers at sdsit@email.alaska.edu**

Next Admissions audio to be held October 9 @ 10:00 AM. Agenda item for that meeting: UA Scholars discussion.
