ADMISSIONS WORK TEAM
MINUTES
September 29, 2008

Attendees:
UAA-Al, Brian
Kenai-
Kodiak-
Mat-su-Fran
UAF-Libby, Crystal, Lael, Colleen, Caty
UAS-Deema
SW-Robbie

1.   UAF applications with status of 'C' project is completed-Libby

        Al will pass this info on to Peggy so she can proceed with her OnBase requests

2.   Remaining questions regarding Application confirmation workflow-Robbie (See Robbie's email of 9/24-attached for your reference)
        UAF has tested, minor questions as to how the information prints-suggest pulling from the description field on soacurr. UAA and UAS will test in prep before our next meeting and all will come with comments and be prepared to approve and send this on to production.

3.   Admissions application purge-Libby

        UAA and UAS have run the purge process (SARETPG) Deema and Al will send their instructions to the group. How do you remove those apps that are continuing to show as errors on the saretmt? UAF has apps that continue to show on the printed report (SARETMT) that have been deleted or the errors have been addressed and the app has been pushed. Caty has rec'd info from Patrick before he left. We'll try that and pass on our findings to the group.

4.   Banner 8.x feedback-Libby *Mass updating functionality for applications will be available-many helpful enhancements in this next version. Which will be easiest for our group-February or October? Difficult regardless of the timing-issues with each time that is suggested. Weigh the functionality available versus the time required to test. No consensus, although the group does agree that if October 2009 is decided, we **must** have the ability to test in July in order to adequately prepare for the upgrade.*

5.   New chair for the team? Libby   *Libby offered to continue as the chair if the group is agreeable. No objections. (You're stuck with me another year).*

        Next meeting-October 13, 2008 @ 10:00am
