Audio # 1-800-893-8850
Audio code 3178469

Agenda:

Present: Julie, Crystal, Peggy and Leesa – Rick King joined for Citrix

1. Prospective Portal
 - a. Have you met with your CMS?
 - b. When will channels be created for the portal?
 - c. Banner Enrollment Management Software

No updates from any MAU. Crystal gave an update on Banner Enrollment Management Software.

2. Web 4 Prospect
 - a. Any updates? No issues from any MAU.

3. EMAS

- a. UA Scholar Bridge – Julie - No chance to test yet. Leesa-pulled UA scholar file, and found that stdimprt text not showing students as UA scholars. Crystal said that was what the most recent task request will fix, but it still needs to go through BST approval. What we should test right now is to make sure the list is a complete list of UA Scholars, and that having a recruit or app record for a different MAU doesn't cause the scholar to drop off from the scholar text file. Peggy suggested using UA Scholar pop selects: UA_SCHOLAR_BY_INVITE_TERM or UA_SCHOLARS (pulls by AS or S5 code). Look at GLRSLCT to look at parameters. Creator id is ANPKI. Use this when running pop select.
- b. Bridge update Julie – still getting numerous suspects for UA Scholars with blank addresses, this will be fixed with latest task request.
- c. Task Request Prioritization: UA Scholar task request priority one as soon as current changes have been moved to PROD. Will fix Julie's issue and correct other issues with stdimprt UA Scholar information. Talked about Checklist items and still need to do some testing with importing and import dominant files.
- d. Distance students – Julie has a question about information on distance status. Discussed where the code comes from on SAAADMS. Each EMAS coordinator will take the Excel file from Melody and identify which fields are coming across the bridge and which ones are available. Crystal will compile and we can come up with an available code and field to use for pulling this information from Banner. We will try to come up with one code from all MAUs to use for consistency.

4. Patrick Update No update.

5. Other items/updates

- a. Citrix Discussion – Ricky gave an update on Citrix. Update Citrix Farm, gives enhancements for security, printing, etc. Allows easier updates and schedule updates. Client side v 9 and above, provides enhancements on the user side. Provides ability to update client side through the web, makes it easier to make sure everything flows better. We have a licensing server now – central

repository, makes easier to get a license when you log in. UAF has 20 licenses, UAA has 20 licenses, and UAS has 10 licenses. Renewed every year in December, try to renew in middle of year considered a new buy, better to do at renewal time. Crystal said 20 licenses good for right now for UAF. Julie inquired about how to get the Citrix set up for UAS. Ricky asked to have Julie's OIT contact him for license info. Julie is ok with the 10 license pack for UAS. Ricky answered some questions for UAA about installs and reinstalls and the licensing server. Peggy is thinking about decreasing to a 10 license pack but will let Ricky/Mary know.
