

Meeting 10/09/2012

Attendees: Crystal, Julie, Daniel, Jane

Updates:

UAS - Julie - starting to use Mailers Plus - learning new techniques with EMAS 9 and imports. Sending info to UA Scholars

UAF - Loading UA Scholars, working communication roll-over, running bridge for almost 2 weeks daily using just Banner to EMAS process. Only loading 300+ right now. Discussed how we generate reports from EMAS for year end.

SRR2BE1 update from Daniel:

Not working on recently, but it's being looked at now. Rewrite is only to organize the code better, and to work on task requests. Clean up and improvement. UAA is working on their side. Daniel says Winston reports it's working for what UAA needs.

UA Scholar and Financial Aid are the two outstanding task requests.

UA Scholar is adding a field, Financial Aid is doing a new file.

Financial Aid (TR 99) is more critical for UAS and UAF. Daniel will be working on 99 task request and adding parameters to SRR2BE1. He will make it so it doesn't impact the UAA side of the process.
