Anderson Building Remodel

Project Description:

This project is a scheduled to follow the move of the UAF School of Fisheries and Ocean Sciences out of the Anderson Building to a new Lena Point facility in 2008. The 30 year old condition of the Anderson Building will be reconfigured for new technical and academic needs. This project will remodel the building to accommodate the singular needs of the UAS Science Department. The project will include classroom, laboratory, faculty office, and research spaces, as well as construction of a pedestrian improvements to Glacier Highway and acquisition of adjacent property and construction of additional parking.

Many building components will be upgraded or replaced including heating and ventilating equipment and controls, the roof, interior finishes and classroom and laboratory casework. Interior space will be reconfigured to improve effectiveness of the teaching areas. The number of faculty offices will be reduced. The work will require portions of the building to be vacated during renovation. This project will acquire the adjacent residential lot and construct additional parking on that site.
