

GENERAL RULES AND REGULATIONS – As of 8.19.2024

NOTE: General rules and regulations apply to all competitive events and are in addition to each event's specific guidelines. Guidelines are subject to change. Please refer to the EdRising Membership Portal for the latest version.

Failure to follow the stated guidelines will result in disqualification of student competing.

All students wishing to compete at the Educators Rising National Conference must complete 3 required steps:

1. **Be an Active level paid national member** of Educators Rising for the current school year. State-level membership must be paid, if applicable. [Click here to join.](#)
2. **Complete the online application** and upload all required materials in their final form by the stated deadline on the [National Competition page](#) located in the Student Resources section in the EdRising Membership Portal. **This is NOT done automatically if you competed at a state or regional conference.**
3. [Register to attend](#) the Educators Rising National Conference.

Eligibility

- Students must be a paid Active-level student member of Educators Rising no later than **February 1st** of the year in which they are competing. **Check or credit card payment must be received in the National Office by February 15th to be considered an Active-level member.**
- **Students may only compete in one competitive event.**
- **For contests:** Teacher leaders may enter up to two entries (individual or dual) per school in each event per division.
 - Dual means two students participating.
 - For dual entries consisting of students of varying grade levels, the entry will be placed in the division for the grade level of the most senior member.
- **For competitions:** Teacher leaders may enter up to two entries per school in each individual event per division and one team for team events per division. Competitions/contests that are marked as individual or dual will be considered individual events for this purpose.
 - All team events must have at least two students (and no more than four) per school to qualify.
 - For teams consisting of students of varying grade levels, the team will be placed in the division for the grade level of the most senior member.
- If a competitor is from a state that holds state competitions/contests, they must first qualify in that given event at their state conference before competing in that event at the Educators Rising National Conference. Contact your state/regional coordinator to see if your state offers competitive events. Visit our [state program page](#) on the Educators Rising national website to contact your state/regional coordinator.
- For states that offer state-level competitive events, the top ten places in each competition for each division offered by the state will be eligible to compete at the Educators Rising National Conference.
- For contests, you must compete in a state level event in order to be eligible to compete at the Educators Rising National Conference. Only entries scoring 97-100 will be eligible to advance to nationals. No other entrants from states that offer the competitive events at the state level will be eligible for those state-level-offered competitive events.
- For nationals, schools are permitted to replace up to fifty percent of the original team members who qualified at the state- level.
- For states that do not offer state-level competitive events, students may register to compete in those events at the Educators Rising National Conference. This applies to all Educators Rising national competitions. This does not apply to contests since you must qualify at state first before moving to nationals in any competition.

- Students who have won state-level competitive events must also submit their entries on the national website by the deadline to compete at the national conference. Your state does not do this for you.

nonverbal assistance to a competitor during that competitor's assigned time slot with the judges. A breach of this guideline may result in the disqualification of the competitor.

- Teacher Leaders, Chaperones, and Parents are prohibited from approaching judges to discuss scoring or feedback. All questions or concerns should be brought to the attention of a national office staff member.

Judging and Scoring

- All competitions will be recorded to allow for review when determining placement.
- Scoring is based on the posted individual competition rubric.
- Final scores will be based on a scaled score. Scaled scores are calculated through a number of methods including judges tie breakers and room normalizations.
- **Judges will break ties in all competitive events.**
- To accommodate a large number of competitors, we use multiple rooms each with its own set of judges. To ensure fairness across these rooms, we employ a well-established mathematical method to normalize scores. This method helps balance judge subjectivity and ensures all competitors have a fair shot, regardless of their assigned room.
 - In each competitive event, each competitor gets an average score from the judges. That score is averaged with the partner judge. If there is a deviation of more than one standard deviation between rooms, the two rooms are normed against one another to that deviation. Final scores used for ranking are the normalized (also known as scaled scores).
 - When normalizing scoring, perfect scores will be excluded from the normalization process. If more than one student in the same division in the same competition receives a perfect score, a second set of judges will review the recorded presentations for those students to make a final decision.

Awards

- For Competitions: Medals and certificates will be presented to the top three entries in each division for individual competitions. Trophies and certificates will be presented to the top three entries in each division for team competitions. All places will receive electronic certificates after the conference.

- For Contests: Ribbons will be awarded to students in each category in each division with scores as follows:
 - Blue-Scores 98-100
 - Red-Scores 94-97
 - White-Scores 90-93

Inquiry Process

- Following the conference, the student scores will be released directly to the participating student(s). The scores will provide individual judges' scores, the average score for the two judges, and the normalized score (if necessary.)
- Students will have 3 business days to file an inquiry regarding the validity of their score. Students will be required to complete the online inquiry request form and submit all required documentation for consideration. **No appeal will be accepted after the 3-day period.**
- Staff will review the scoring and respond to the inquiry within 30 days. **All decisions are final.**

Contest Purpose

It's time for you to give your TED Talk. Not sure what that is? Check out some of the most viewed TED Talks here: www.ted.com.

Storytelling and effective oral communication skills are vital qualities for professional success. Captivating an audience and sustaining their attention and wonder with a compelling topic remains one of the most valuable abilities in an increasingly networked society. Because great stories about meaningful topics are so fascinating and valuable, TED Talks have become one of the most influential contributions to the Internet, garnering over a billion views. These creative lectures present bold ideas often through personal lenses and have elevated a public speaking format that has been replicated across the world. Watch some TED Talks on education here: www.ted.com/topics/education.

The Creative Lecture Competition will offer ambitious, fearless, bold-thinking students a platform for sharing their ideas in a format that has been embraced by intellectual society.

The topic for the 2025 Creative Lecture Competition is: The Double-Edged Sword of AI

PROMPT: Artificial intelligence, specifically large language models like ChatGPT, has irrevocably altered the educational landscape. This technology presents a complex interplay of benefits and challenges, raising questions about its impact on learning, creativity, and academic integrity.

In the 2023 Kappan magazine article titled "Leveraging AI to Enhance Learning," authors Sarah W. Beck and Stephen R. Levine explore the potential and challenges of integrating AI in educational settings. The article suggests that the potential of AI in education necessitates a careful and informed approach to its integration in classrooms to ensure it supports equity and inclusivity (Kappan Online, 2023) "Technology is not neutral. It is a tool that can be used for good or evil. It is up to us to decide how it will be used."

What are the potential negative impacts of AI on students' critical thinking, creativity, and ability to learn independently? How can educators adapt their teaching methods to leverage the benefits of AI while mitigating its risks? What is the ethical dimension of using AI in education, including issues of plagiarism, academic integrity, and equity?
