

Institutional Research Systemwide Council Scorecard

Last Updated December 6, 2018

The council exists to promote and support system-wide capacity for collection and analysis of data to guide decisions that improve success on behalf of the University of Alaska System of Higher education, with an emphasis on optimizing resources for the achievement of UAA, UAF, UAS, SW's and UA's missions.

Goal	Focus Areas	Measurable Outcomes	Status
Teacher Education Information Support	Information systems and IPEDS reflect programs open for admission and enrollment	Banner curriculum module data aligns with programs noted in SB241 report	✓ University IR officer responsible to coordinate university-level efforts to make required technical updates in Banner to align programs offered, in collaboration with university registrars and university teacher education dean/director. Gwen hosting Q&A sessions on process, to support new IR leaders. Fall Closing freeze date may be pushed back if required to complete in time.
Research & Sponsored Program Information Support	Meet goals set by university relations and research councils for basic data quality improvements in support of advocacy and operational needs	Common, consistent data entry practice and standards for Agency and Theme	✓ IR officers asked to provide need and resource inventory to inform updates; completion timeline TBD pending needs and availability inventory, and
Health & Related Information Support	Information systems reflect current department and unit structure for health & related programs	Health & Related program data associated with correct, current department and unit for official reporting	✓ In progress; on track to complete before fall 2018 semester closing extract scheduled January 8, 2019
Standard Elements for IR function work products	Availability of common, standard citation conventions and language for use in IR function reports and analyses	Layperson audience able to readily discern and understand basic info about any work product, regardless of which IR office authored	✓ In progress; seeking feedback on standard report elements important to various audiences. Goal to adopt common conventions early 2019.
