UA utilizes an unduplicated race categorization, although students often identify as more than one race/ethnicity. This compilation method allows each student to be counted uniquely. For example, if a student declares as Alaska Native and White, that person would be recorded as one Alaska Native student, for a total headcount of one. In the past five years, the number of students choosing to not self-report a race has increased by 25 percent, which makes information trends less meaningful.

Note: Each student self-reports demographic information, and all reporting is voluntary.

In 2012, 56.8 percent of all university students nationwide were women (NCES 2013, [https://nces.ed.gov/programs/digest/d13/tables/dt13\\_303.60.asp](https://nces.ed.gov/programs/digest/d13/tables/dt13_303.60.asp)), representing a slightly smaller proportion than UA's 58.9 percent (65.6 percent at UAS, 58.5 percent at UAA, and 58.1 percent at UAF).

Note: Reporting level headcount is unduplicated. Academic Organization (AO) headcount totals add up to more than university totals and university headcounts add up to more than the system total. This occurs because it is common for students to be concurrently enrolled at multiple AOs and/or multiple universities in the same semester. Therefore, some students would be double counted if headcounts were summed across AOs and universities. Headcount includes students who audit credit courses.
