# Summary: Graduation Rates

Graduation rates in UA's four-year programs are still above the national average for public open admission institutions, although dropping from all-time high levels observed in FY21. The FY24 graduation rate for first-time, full-time freshman seeking any undergraduate degree was 38.0 percent, an increase of 4.6 percentage points over the FY17 rate of 33.4 percent (Table 1).

Graduation rates in UA's two-year or shorter programs have fluctuated considerably in recent years. The proportion of first-time, full-time freshman who pursued and earned a degree 2-years or less in length within 3 years changed significantly over the last seven years - from 20.8 percent in FY17 to an all-time high of 28.6 percent in FY23 then decreased to 22.0 percent in FY24 – representing an 7 year increase of more than 1.2 percentage points (Table 3). The proportion of indigenous first-time, full-time freshman who earned a degree 2-years or less in length within 3 years has increased 0.3 percentage points since FY17, reaching 11.0 percent in FY24 (Table 4).

Students receiving the UA Scholars award have higher graduation rates than other student aid recipient groups. First-time, full-time UA scholars seeking a bachelor's degree, and earning any undergraduate degree, graduate at a higher rate than any other group of students. Examining just the last three fiscal years, FY24, FY23, and FY22, 61.4 percent, 58.0 percent, and 64.3 percent respectively of first-time full-time UA Scholar freshmen bachelor's degree seeking students earned any undergraduate degree in six years (Table 5). Comparatively, the overall graduation rates for UA students were 39.2 percent in FY24, 38.4 percent in FY23, and 42 percent in FY22 (Table 1).

Compared to similar institutions nationally, UA students are more likely to graduate. The national six-year baccalaureate graduation rate for students enrolling at public, four-year, open admission institutions was 26.6 percent in FY22 (NCES 2023[1]). The rate for UA students at that time was 35.7 percent, which is 9.1 percentage points higher than the national rate (Table 1). The most recent published national six-year baccalaureate graduation rate of indigenous, degree-seeking students enrolling at public, four-year, open admission institutions was 18.8 percent in FY22 (NCES 2023[2]). For indigenous students attending UA, 17.2 percent of those pursuing a bachelor's degree graduated within six years (FY20), 1.6 percentage points lower than the national average at similar institutions (Table 2).

| FY24 (Enter Fall 2018) | 34.3 | 35.6 | 40.6 | 43.3 | 33.5 | 36.6 | 38.0 |

The most recently published national six-year baccalaureate graduation rate for students enrolling at public, four-year, open admission institutions was 26.6 percent in FY22. About 35.7 percent of students pursuing a bachelors degree from UA graduated within six years, 9.1 percentage points more than the national average for similar institutions.

Note: Graduation rates are calculated at two reporting levels, the university level and UA System level. University level graduation rates represent whether or not a student graduated from the same university they initially entered, while UA System level graduation rates represent whether or not a student graduated from any university in the UA System. A student is counted the first time they receive a degree and if multiple degrees are earned in one year, the highest degree is selected. University cohorts are determined based on student class standing, full-time status, and degree combination at the university level. The UA System cohorts are determined based on student class standing, full-time status, and degree combination at the UA System level.

UNIVERSITY of ALASKA
Many Traditions One Alaska

Note: Graduation rates are calculated at two reporting levels, the university level and UA System level. University level graduation rates represent whether or not a student graduated from the same university as he or she initially entered, while UA System level graduation rates represent whether or not a student graduated from any university in the UA System. A student is counted the first time they receive a degree and if multiple degrees are earned in one year, the highest degree is selected. The university cohorts are determined based on student class standing, full-time status, and degree combination at the university level. The UA System cohorts are determined based on student class standing, full-time status, and degree combination at the UA System level.

UNIVERSITY of ALASKA
Many Traditions One Alaska

Note: Developmental refers to courses that provide basic or supplemental preparation for introductory college courses. Developmental courses are available in several areas, with those in math and English making up the majority taken. Developmental coursework is not applicable to transcripted certificates or to associate, baccalaureate, or graduate degrees, even by petition. A developmental course is one that has a course number from 050 to 099. Graduation rates are calculated at two reporting levels, the university level and UA System level. University level graduation rates represent whether or not a student graduated from the same university as he or she initially entered, while UA System level graduation rates represent whether or not a student graduated from any university in the UA System. A student is counted the first time they receive a degree and if multiple degrees are earned in one year, the highest degree is selected. The university cohorts are determined based on student class standing, full-time status, and degree combination at the university level. The UA System cohorts are determined based on student class standing, full-time status, and degree combination at the UA System level.

UNIVERSITY of ALASKA
Many Traditions One Alaska

Note: Students voluntarily self-report race and ethnicity if desired; Indigenous students self-report at least some Alaska Native and/or American Indian heritage. Developmental refers to courses that provide basic or supplemental preparation for introductory college courses. Developmental courses are available in several areas, with those in math and English making up the majority taken. Developmental coursework is not applicable to transcripted certificates or to associate, baccalaureate, or graduate degrees, even by petition. A developmental course is one that has a course number from 050 to 099. Graduation rates are calculated at two reporting levels, the university level and UA System level. University level graduation rates represent whether or not a student graduated from the same university as he or she initially entered, while UA System level graduation rates represent whether or not a student graduated from any university in the UA System. A student is counted the first time they receive a degree and if multiple degrees are earned in one year, the highest degree is selected. The university cohorts are determined based on student class standing, full-time status, and degree combination at the university level. The UA System cohorts are determined based on student class standing, full-time status, and degree combination at the UA System level.
