

Regents' budget invests in K-12, energy & workforce

The University of Alaska Board of Regents approved a budget at the Oct. 31, 2008, meeting that places K-12 partnerships and outreach, engineering, energy, health, climate change and workforce programs as top priorities.

The \$345 million request for state investment in the university's 16-campus system now goes to the governor for consideration. The governor crafts the state budget in December and presents it to the Legislature in January.

The university generates its own money from tuition, research grants and other income for a total FY10 budget of \$849.6 million.

"This budget strengthens our partnerships within the public school system and the state Department of Education and Early Development, and provides funding to better support those students once they come to the university," said Board Chair Mary K. Hughes. "The budget also reflects our commitment to double the number of engineers we graduate by 2012, positions the university as a national and even global leader in energy solutions and climate change, and invests in critical workforce programs, including health."

BOARD OF REGENTS

Chair

Mary K. Hughes (2002-2009)

Vice Chair

Cynthia Henry (2003-2011)

Secretary

Michael Snowden (2003-2009)

Treasurer

Carl Marrs (2005-2013)

Tim Brady (2005-2015)

Fuller Cowell (2007-2015)

William Andrews (2007-2009)

Erik Drygas (2007-2011)

Pat Jacobson (2007-2015)

Bob Martin (2005-2013)

Kirk Wickersham (2007-2015)

Board Office

The University of Alaska Board of Regents is the governing body responsible for the university policy and management through the president. Regents are appointed by the governor for eight-year terms, subject to legislative confirmation. A student regent is appointed for two years from candidates nominated on each campus. (Regents' term of office shown in parentheses.)

Fire House Tour

UAF Fire Chief Edie Curry, left, explains to the UA Board of Regents and Interior legislators that improvements are needed at the UAF Fire Station, which doesn't meet current fire code and doesn't comply with the Americans with Disabilities Act. Pictured right from Curry are Borough Assembly Presiding Officer Nadine Winters (not facing camera); UAF Interim Chancellor Brian Rogers; Regent Fuller Cowell; State Sen. Gene Therriault, R-North Pole; Regent Kirk Wickersham; and Regent Mike Snowden. Photo by Kate Ripley ©2008 University of Alaska.

Faculty Alliance

Jill Dumesnil, Faculty Alliance chair and president of the UAS Faculty Senate, addresses members of the board during public testimony. Dumesnil is a mathematics professor at UAS. Photo by Kate Ripley ©2008 University of Alaska.

The university's enrollment in high-demand degree programs is at record levels, according to university statistics. Those programs include nursing, allied health, behavioral health, engineering, welding, computer networking, construction management and technology, information technology and many others. In addition, UA's undergraduate retention rate also is at a record high for the institution.

"When you look at how we're measuring performance, we're doing very well," noted Regent Tim Brady.

Public turnout at the one-day meeting was considerable, with many students and employ-

ers speaking in support of engineering, biology, indigenous studies, health and clinical training and other programs.

In addition to the \$2.6 million for K-12 outreach and partnerships such as Tech Prep, summer bridging programs, testing and placement, the operating budget also includes the following:

- \$1.4 million in energy solutions for Alaska, including critical faculty members in energy economics, renewable power and alternative energy, plus outreach through the university's Cooperative Extension Service;
- \$1.5 million toward engineering programs;
- \$3 million toward the university's biomedical capacity and health programs, including new faculty positions in key areas;
- And \$2.3 million for campus workforce programs, including the marine transportation program at UAS-Ketchikan; the process technology program at Kenai Peninsula College; and the Career, Vocational and Technical Program at Kodiak College.

Biology support

UAF Biology majors speak to members of the Board of Regents in support of the new Life Sciences Building. Photo by Kate Ripley ©2008 University of Alaska.

UA's proposed capital budget, at nearly \$400 million, puts a top priority on maintaining existing facilities and equipment (\$50 million); a new Life Sciences Building at UAF (\$82 million); campus entrance improvements at UAS in Juneau (\$4 million); the second installment toward a new UAA Sports Arena, (\$65 million); and reduce a major maintenance backlog across the UA system (\$150 million).

In other business, the board also:

- Approved the sale of 43 acres of university property in the Matanuska-Susitna Valley to the state Department of Transportation and Public Facilities, for \$6.5 million;
- Reviewed the first draft of a proposed six-year capital improvement plan;
- And toured some UAF programs and facilities, including several research programs, the School of Engineering and Mines and the UAF Fire Department.
