Known system down time?

Not discussed

BST Minutes for 3/24/05 Continued

From Saichi:

Testing Plans from student workgroups – not discussed

Requests:

From Mike E:

Please add the attached task request to the next BST agenda.

TR_SPP2RMV_022805 - approved

TR_SAR2ASR_022805 - approved

From Colleen:

Please add the attached task request to the agenda for this week.

Catalog Course Copy – approved

Other:

Saichi discussed visit to Univ of Hawaii; 10 folks from UA met with UofH IT staff; UofH focused on Banner issues with UA; focused on Luminus issues with UofH; spoke on how our work team meet & communicate with each other; spoke about how our structure of communication differs from UofH; UofH provided info on how Luminus could not handle ALL students going through portal to register (RED FLAG for UA System to investigate as Portland Community College had the same issue with the Luminus product). Overall, UA folks felt happy with what we have done with our system compared to UofH.

Portal opened for 400 pilot users. Some issues about their EDIR password.

Non-transcripted certificate workgroup will meet on 3/28, possible face-to-face mid April in Anchorage. Barb Hegel had asked Saichi to join her to this workgroup.
