Help legend improvements to UAOnline Look-Up Classes to Add, requested by UAOnline student feedback report, from Mary Gower.

Legend amended to add CRN and Days of Week; Add XL Cross-listed definition as text below legend box.

TR#6(includes #7) - ~~Secure Catalog search – See TR#8 below~~ Remove “College” & “Division” words from being added to table values.

On UAOnline Catalog Search, print values from STVCOLL and STVDIVS without adding any additional words, which caused redundant wording such as Division of xxx Division.

TR#8 - Secure "Display Dynamic Catalog" and "Display Dynamic Schedule"

Move from Student Records section to Registration section. Link to TR#1 and TR#3.

Move Catalog Search link to Registration as above, opening a new window to non-secure Catalog Search (returning student to secure side when closed). Add a link to “Look-Up Classes to Add” under Registration. Remove both “Display” links from Student Records.

TR#4(includes #5) - Discussion of current functionalities of prerequisite listings. No task request will be submitted at this time. UAF and UAS use original PR# to code Prerequisites, which show up on page 1 of UAOnline catalog. UAA uses SCAPREQ exclusively, which shows up on page 2. Further discussion at BSF2F, especially in light of future prerequisite checking.

Other items Mary Gower's reminder that banner Prod and Trnx passwords change Oct 4.

(See 9/12 email for details).
