University of Alaska Facilities Inventory

Introduction

The 2024 Facilities Inventory Report represents a comprehensive listing of physical assets owned and operated by the University of Alaska (UA), which it uses to fulfill its missions of higher education, research, and public service to the people of Alaska. The tables present, in summary form: average age, gross square footage (GSF), facility investment value (including capitalized improvements), and the assets' facility investment value adjusted to the current year. Facilities are listed by major administrative unit (MAU): University of Alaska Anchorage (UAA), University of Alaska Fairbanks (UAF), University of Alaska Southeast (UAS), and UA System Office (UASO). AiM facilities management software and MAU input is the source of the data used for this publication. The adjusted value referenced in this document was collected fall 2024 and includes capital improvements during fiscal year 2024.

In fall 2024, the University of Alaska owned 402 facilities (8.2 million gross square feet) with an average age of 37.4 years. Average age reflects building age as provided by the MAUs; however, multiple buildings have been re-aged due to significant upgrades. The total adjusted value of the university's facilities, including infrastructure and other capital assets, is approximately \$6.2 billion.

UAA comprises 40.4 percent of facility GSF, with the majority located on the Anchorage Campus. The remaining facilities are located at the campuses of Kenai Peninsula College with locations in Homer, and Soldotna; Kodiak College on Kodiak Island; Matanuska-Susitna College in Palmer; and Prince William Sound College in Valdez.

At 50.4 percent of total GSF, UAF has the largest percentage of gross square footage. Greater than half of these facilities are located on the Troth Yeddha' Campus, with the remaining facilities located at the: Bristol Bay Campus in Dillingham; Chukchi Campus in Kotzebue; Interior Alaska Campus with locations in Fairbanks and Tok; Kuskokwim Campus in Bethel; Northwest Campus in Nome; UAF Community and Technical College in Fairbanks; and research facilities in Juneau, Kodiak, Seward, Chatanika (Poker Flat), Palmer, and Toolik Lake.

UAS is 6.2 percent of the total GSF, with the majority of facilities located on the Juneau campus, and the remaining located at the Sitka and Ketchikan campuses.

UA System Office's percent of total GSF is 3.0 percent, with a majority of facilities split between Fairbanks and Anchorage.

Infrastructure and other capital assets (OCA) summaries by MAU are included following the full building list. These investments include access roads, utility lines, parking lots, campus lighting, and other support facility site improvement costs not capitalized in the facilities. Like the facilities, campus infrastructure and OCA must be maintained.

A separate section identifying non-UA facilities are also included in this document. Facilities on UA land may eventually become university property when their terms expire. Leased facilities are included in this publication; however, are not included in the facilities summary.

University of Alaska Facility Inventory Definitions

Fiscal

Adjusted Capital Investment Value:

The adjusted capital investment value is the inflation-adjusted value based on the RSMMeans Construction index, which is applied to capitalized investment in past years, in order to adjust the value of investment to current dollars.

Capital Investment Value:

The capital investment value is the total capitalized funds used to construct or purchase facilities, fixed equipment, and associated infrastructure as it currently exists. These amounts take into account all funds subsequently capitalized for later building phases and/or additions to the facility after its original occupation date.

Capital Project:

A project with a total project cost in excess of \$50,000, excluding movable equipment, that creates an asset with a useful life in excess of one year, extends the useful life of an existing asset, or corrects a significant backlog of code correction, handicapped barrier removal, or asset protection projects; these projects may be funded through capital appropriations, operating budgets, gifts, grants or bond proceeds (Regents' Policy P05.12.020.C).

Deferred Maintenance and Renewal (DM&R):

The correction of deficiencies from the cumulative effect of major renewal and replacement, and renovation projects that have not been carried out; special consideration should be given to identification and completion of deferred renewal projects that will result in further deterioration of a facility if not completed; deferred renewal excludes new construction unless specifically authorized (Regents' Policy P05.12.020.D).

Maintenance and Operations (M&O):

M&O is similar to M&R but is an expanded category that includes operation of facilities such as janitorial, security, related staff, and utilities.

Maintenance and Repair (M&R):

Recurrent day-to-day work required to preserve or immediately restore a facility or fix equipment to such a condition that it can effectively be used for its designated purpose; maintenance may take the form of routine or preventive activities or emergency work or service contracts; maintenance and repair costs may not be capitalized; maintenance and repair excludes new construction unless specifically authorized by the university's chief finance officer (Regents' Policy P05.12.020.H).

New Construction:

The erection of a new facility or the addition or expansion of an existing facility or internal build-out of unfinished space that adds to the building's usable space; new construction may include support facilities for the buildings including outside utilities, parking, roads, walks, landscaping, and signage (Regents' Policy P05.12.020.K).

Renewal and Replacement (R&R):

The systematic repairs and replacements that extend the life and retain the usable condition of a facility, component or system; the modification of a facility so as to reduce or eliminate functional obsolescence can be completed under this category (Regents' Policy P05.12.020.Q).

Fiscal Year:

A twelve-month period between settlements of financial accounts. The university's fiscal year runs from July 1 through June 30.

**University of Alaska
Facility Inventory Definitions**

Property

Age:

Facility age is determined by the year it was built (construction is completed and the facility is ready for occupancy), or its' re-aged year (significant facility upgrades have occurred to replace facility components reaching obsolescence). The year a facility is acquired is representative of length of ownership, and is not used for age calculations.

Facility:

Any physical structure or space required by the university for the performance of its programs and related activities (Regents' Policy P05.12.020.E).

Infrastructure:

Expenditures for projects of \$100,000 or more for the construction or acquisition of infrastructure. Infrastructure assets are long-lived capital assets that normally are stationary in nature and can be preserved for a significant number of years. Infrastructure assets are often linear and continuous in nature.

Investment Property:

UA investment properties are revenue-generating facilities leased to non-UA tenants.

Other Capital Assets:

Capital expenditures, which do not meet the definition of equipment, fixed equipment, buildings, infrastructure, etc., but have a unit cost of \$50,000 or more. Structures which have two or less of the four major utilities (water, electricity, heat, internet) are included in this category (examples: outdoor shelters and storage buildings).

Policy

Long-range Capital Plan:

A comprehensive listing of all planned capital asset investments for six or more years, regardless of funding source, including proposed construction, renovations, and educational property acquisitions, selected equipment and technology improvements, and reportable-leased facilities regardless of funding source (Regents' Policy P05.12.020.G).

Naming of Campus Facilities:

Official naming of all "significant" facilities and facility subcomponents are approved by the Board of Regents. The UA President is authorized to determine which naming will be considered "significant" for purposes of approval. (Regents' Policy P05.12.090)

Space

Additions/Expansions:

The addition of space such as a room or section appending from an original structure or a build-out of unfinished space that subsequently increases in size, square footage and value.

Gross Area – Gross Square Feet (GSF):

The sum of all areas on all floors of a building included within the outside faces of its exterior walls. This includes circulation, shaft areas, structural areas, mezzanines, corridors, stairways, and elevator shafts.

Primary Use:

The primary function of the facility determined the most predominate space type per assignable space.
